Employment History

Senior Software Engineer at GotPhoto/fotograf.de, Berlin

October 2023 — Present

- Led efforts on the **Tech Modernization (TMOD)** team to successfully migrate legacy applications from **CakePHP** to modern frontend frameworks, significantly improving app performance and maintainability.
- Joined the **UX Overhaul** team to enhance user experience and interface design, resulting in improved user satisfaction and directly contributing to securing new customers and business growth.
- Currently part of a team responsible for managing image-processing services critical to the platform's core functionality and performance.
- Collaborated with designers to translate Figma specs into accessible, interactive UI visualizations.
- Actively collaborate with backend engineers and cross-functional teams to deliver clean, testable, and maintainable code, emphasizing best practices and high-quality standards.
- Participate in ongoing code reviews, mentoring peers, and driving improvements in software stability and overall user experience, directly supporting GotPhoto's business goals.

Lead Developer at Infaque Business Solutions, Lahore, Pakistan

August 2021 — September 2023

- Boosted system performance and scalability by architecting solutions with AWS QLDB, Firebase, and Pub/Sub, enhancing user experiences and customer retention.
- Enhanced security and streamlined onboarding through robust authentication (IDP/SAML) with Auth0 and Firebase, fostering client trust.
- Expanded capabilities by delivering the first web application using JavaScript and Google Cloud Platform (GCP), enabling quicker deployment.
- Collaborated with design teams to create user-centric interfaces, increasing user engagement and satisfaction.
- Managed project lifecycles efficiently, accelerating software delivery and reducing deployment issues in a Test driven development environment.

Full Stack Developer at Infaque Business Solutions, Lahore, Pakistan

November 2020 — August 2021

- Managed and mentored development team, enhancing productivity and collaboration in an agile environment.
- Developed web applications in React.js, adapting to technologies and requirements, improving product offerings.

- Implemented and maintained CI/CD pipelines using GitHub Actions, accelerating development cycles.
- Implemented E2E using selenium and cypress in a BDD fashion.
- Optimized application performance and cloud resource usage, reducing costs and improving efficiency.
- Assessed and on boarded new team members, streamlining integration processes.

Education

BS Software Engineering, University of Lahore, Lahore, Pakistan

September 2016 — June 2020
