Experience

Gotphoto / fotograf.de

Senior Software Engineer

Berlin, Germany
October 2023 - Present

- Frontend Modernization:** Contributed to the migration of a legacy CakePHP interface to a Next.js and GraphQL architecture, resulting in improved type safety, performance, and developer velocity.
- System Architecture:** Participated in the decomposition of a monolithic core into microservices; contributed to API design, service extraction strategies, and cross-service integration.
- Event-Driven Systems:** Engineered and maintained features within an asynchronous, event-driven AWS ecosystem (SNS, SQS), ensuring robust service decoupling.
- Scale & Performance:** Managed high-volume image workflows handling millions of assets, optimizing storage, retrieval, and processing logic.
- Cross-Platform Integration:** Developed and maintained specialized client-side software, including Electron applications and Lightroom plugins tailored for professional photography workflows.
- AI-Augmented Engineering:** Leveraged AI-augmented engineering workflows, utilizing LLM-based agents, Claude, and specialized coding assistants (e.g., MCP-integrated tools) to accelerate full-stack development, complex debugging, and rapid prototyping.
- Innovation & Revenue:** Spearheaded internal AI tooling initiatives to reduce external vendor reliance; delivered high-impact features through internal hackathons that directly optimized user workflows and generated new revenue streams.
- Operations:** Contributed to infrastructure scalability and CI/CD pipeline improvements; participated in on-call rotations to ensure system reliability and incident resolution.

Infaque

Lead Developer (Promoted from Full Stack Developer)

Lahore, Pakistan
November 2020 - September 2023

- Foundational Engineering:** Joined as the first employee, architecting the initial codebase and scaling the technical infrastructure to support a growing organization of 20+ members.
- Payment Infrastructure:** Architected and integrated a multi-vendor payment gateway system supporting diverse charitable organizations, managing complex integrations with **Stripe, PayPal, and regional North American providers.**
- Product Launch & Architecture:** Engineered a high-performance architecture using **GCP, QLDB, and Firebase Pub/Sub** to facilitate the successful market release of the company's flagship product.
- Full-Stack Strategy:** Led development using React and serverless architectures to prioritize rapid feature delivery and high availability across the GCP suite.
- Engineering Leadership:** Directed the end-to-end recruitment process, assessment, and onboarding of the engineering team while mentoring junior developers to maintain high coding standards.
- Security & Identity:** Implemented enterprise-grade authentication and identity solutions using **IDP and SAML** via Auth0 and Firebase.
- DevOps & Delivery:** Established and managed CI/CD pipelines using GitHub Actions, ensuring a consistent and automated deployment cycle for all production releases.
- Project Management:** Managed technical roadmaps and task distribution via Jira, translating complex client requirements into scalable technical specifications.

Upwork

Freelance Web Developer

Lahore, Pakistan
Sep 2019 – Oct 2020

- Delivered full-stack JavaScript solutions for international clients via Upwork, maintaining a 100% Job Success Score and specializing in React and Node.js integrations.

Technical Experties

- Languages:** JavaScript (ES6+), TypeScript, PHP.
- Frontend:** React, Next.js, GraphQL, HTML5/CSS3.
- Backend & Cloud:** Node.js, AWS (SNS/SQS/Lambda), GCP, Microservices.
- Tools:** Docker, Git, CI/CD, AI-Augmented Engineering (LLM/MCP).
